

PUNEET BEHL

Principal Engineer | Distributed Systems & Cloud Architecture | AI-Driven Engineering

Bangalore, Karnataka, India | +91 9711616135 | puneet739@gmail.com | linkedin.com/in/puneetbehl

PROFESSIONAL SUMMARY

Principal-level Technical Architect with 16+ years designing and scaling distributed, fault-tolerant systems across Healthcare and BFSI. Deep hands-on expertise across Java/Spring Boot microservices, AWS/Kubernetes cloud-native architecture, and event-driven systems processing 50M+ requests/day at 99.99% uptime. Pioneered AI-integrated, spec-driven development and an AI-based clinical summarization engine, cutting engineering cycle time by 60% and manual record-review effort by 35%. AWS Certified Solutions Architect and Certified Kubernetes Application Developer (CKAD) with a consistent record of owning end-to-end architecture, driving technical strategy, and mentoring senior engineers across healthcare and financial-services platforms.

CORE TECHNICAL SKILLS

Cloud & Infrastructure: AWS (EC2, Lambda, ECS, EKS, CloudFormation, Route53, CloudWatch, WAF, S3), Kubernetes, Docker, Podman, Terraform, Linux, Shell Scripting

AI & Emerging Technology: AI-Integrated / Spec-Driven Development, AI-Assisted Clinical Summarization, LLM-Based Workflow Automation, Agentic AI Design Patterns

Backend & Architecture: Java, Spring, Spring Boot, Spring Cloud, Microservices Architecture, Event-Driven Architecture, RESTful Web Services, Distributed Systems (50M+ requests/day), Design Patterns

Data & Messaging: MongoDB, Cassandra, Redis, Solr, Kafka, MySQL, PostgreSQL, SQL, NoSQL

Healthcare Interoperability: HL7 FHIR, SMART on FHIR, Cerner, CommonWell, CareQuality, HIPAA, CDS Hooks

Observability & DevOps: Datadog, OpenSearch, CI/CD, Jenkins, Git, JUnit, Jira, Agile/Scrum

PROFESSIONAL EXPERIENCE

Technical Architect / Engineering Manager Aug 2021 – Aug 2026

AthenaHealth — Bengaluru, India

- Architected and rolled out an AI-integrated, spec-driven development workflow adopted across 7 teams and 35 engineers, reducing development cycle time by 60%.
- Designed and scaled a distributed platform processing 50M+ requests/day, sustaining 99.99% uptime through a highly available, fault-tolerant architecture.
- Led the hands-on migration of production workloads from AWS ECS to Kubernetes/EKS, including full service dockerization, as a Certified Kubernetes Application Developer.
- Owned end-to-end interoperability of clinical data (problems, allergies, documents) with Cerner, CommonWell, and CareQuality using HL7 FHIR and SMART on FHIR, driving a 23% increase in provider adoption.
- Built an AI-based clinical summarization engine that surfaced actionable insights, cutting patient-record review time by 35%.
- Designed a leadership-facing engineering dashboard integrating Datadog, OpenSearch, and Jira for real-time delivery and reliability visibility.
- Owned production reliability, observability, and incident management for a mission-critical healthcare SaaS platform.
- Provided technical direction and architecture review across backend services, APIs, and cloud infrastructure while mentoring senior engineers and leads.

Lead Member Technical Staff Aug 2018 – Aug 2021

AthenaHealth — Bengaluru, India

- Led technical design and architecture for scalable enterprise healthcare platforms, defining high- and low-level designs (HLD/LLD) for cloud-native services.

- Drove adoption of microservices and event-driven architecture patterns across core platform services.
- Partnered with product and engineering stakeholders on design reviews, code reviews, and engineering best practices.
- Contributed to the architectural evolution of distributed systems supporting enterprise healthcare workloads.

Senior Software Engineer Jul 2016 – Aug 2018

Hcentive — Noida, India

- Led hands-on prototyping, design, and architecture for a mobile/micro-financial product, defining HLD and LLD for scalable Java systems.
- Drove the engineering process end-to-end, from sprint planning through QA, for enterprise-grade software delivery.
- Partnered with cross-functional stakeholders to define functional and non-functional requirements.

Team Lead Dec 2014 – Jul 2016

Sapient Global Markets — Gurgaon, India

- Designed and developed back-end modules for a low-latency capital markets platform, leading a team of 2 engineers.
- Engaged in requirement analysis and solution design as Software Designer in the financial domain.

Senior Software Engineer Feb 2014 – Dec 2014

Nagarro — Gurgaon, India

- Designed and developed the seller panel from scratch using Spring Boot and Spring components.
- \Engaged directly with client teams on requirement gathering and product understanding.

Java Software Engineer Jan 2010 – Feb 2014

Utiba Mobility / Amdocs — Gurgaon, India

- Built enhanced UI components using CSS and stylesheets, improving customer adoption.
- Implemented role-based access control aligned to user permission sets.
- Authored JUnit-based unit test suites to strengthen code quality.

CERTIFICATIONS

AWS Certified Solutions Architect – Associate | Certified Kubernetes Application Developer (CKAD) | Certified ScrumMaster (CSM)

EDUCATION

Bachelor of Technology, Computer Science — ICFAI Tech, Dehradun (2006 – 2010)

AWARDS

AI Leader — AthenaHealth (2026) | Outstanding Performance in Platform — AthenaHealth (2024) | Best Tech Team — Hcentive (2017) | Exceptional Delivery — Utiba (2012)
