

PUNEET BEHL

Engineering Manager | Backend & Distributed Systems | People Leadership | SaaS & BFSI

Bengaluru, Karnataka, India | +91 9711616135 | puneet739@gmail.com | linkedin.com/in/puneetbehl

PROFESSIONAL SUMMARY

Engineering Manager with 16+ years of software engineering experience and 5 years of formal people-management experience, leading engineering teams of up to 10 engineers/leads across healthcare SaaS and BFSI technology environments. Experienced in owning engineering delivery, team development, hiring, performance management, architecture, system design, production operations, and cross-functional execution. Strong technical foundation across Java, Spring/Spring Boot, AWS, Kubernetes, microservices, distributed systems, APIs, event-driven architecture, and cloud platforms. Proven track record delivering systems handling 50M+ requests/day at 99.99% uptime, improving development cycle time by 60%, and driving engineering transformation across multiple teams.

CORE COMPETENCIES

Engineering Leadership: Engineering Management, People & Team Leadership, 1:1s & Performance Management, Career Development & Growth Plans, Promotions & Performance Calibration, Hiring & Interviewing, Mentoring & Coaching, Team Scaling, Delivery Ownership, Resource & Capacity Planning, Stakeholder Management, Cross-Functional Leadership

Technical Leadership: Backend Engineering, System Design & Architecture, Distributed Systems, Microservices, Event-Driven Architecture, REST APIs, API Integrations, Technical Design Reviews, Code & PR Reviews, Cloud Architecture, Platform Modernization, Engineering Quality

Engineering Operations: Production Operations, Incident Management, Reliability Engineering, Observability, Engineering Metrics, Delivery Predictability, CI/CD, Release Management, AWS, Kubernetes/EKS, Datadog, OpenSearch, Jira

Domain: B2B SaaS, Healthcare Technology, BFSI, Enterprise Platforms, Cloud-Native Products, Data Interoperability

PROFESSIONAL EXPERIENCE

AthenaHealth — Bengaluru, India

Engineering Manager

August 2021 – August 2026

- Led and managed an engineering team of up to 10 engineers/leads, owning team development, delivery execution, performance management, hiring, mentoring, career growth, and engineering quality.
- Conducted 1:1s, performance reviews, growth planning, mentoring, promotion processes, and performance management for direct reports.
- Grew the engineering team from 5 to 10 members, supporting organizational scaling while maintaining strong team retention, with only 1 attrition over 4 years.
- Led 10+ interview drives and closed 20 hires, maintaining a strong engineering hiring bar and building team capacity for product growth.
- Built data-backed promotion cases for 3 direct reports, successfully supporting their career progression and promotions.
- Owned engineering delivery and resource planning, translating feature requirements into timelines, capacity requirements, staffing needs, and execution plans.
- Partnered with Product and cross-functional stakeholders to balance feature delivery, technical debt, reliability improvements, and strategic engineering investments.
- Provided technical direction across backend services, distributed systems, APIs, cloud infrastructure, and platform architecture, while maintaining hands-on technical depth.
- Led design and architecture initiatives for systems processing 50M+ requests per day while sustaining 99.99% platform uptime.
- Led the migration of production workloads from AWS ECS to Kubernetes/EKS, improving deployment reliability and operational resilience.
- Owned production platform reliability, working with Datadog and OpenSearch for monitoring, observability, operational visibility, and reliability management.
- Built a leadership-facing engineering dashboard integrating Datadog, OpenSearch, and Jira, providing real-time visibility into delivery progress and platform reliability.
- Led cross-functional delivery of clinical data interoperability capabilities using HL7 FHIR and SMART on FHIR, coordinating Engineering, Product, Compliance, and external technology partners.
- Delivered integrations with Cerner, CommonWell, and CareQuality, contributing to a 23% increase in provider adoption.
- Championed organization-wide adoption of an AI-integrated, specification-driven development workflow across 7 teams and 35 engineers, reducing development cycle time by 60%.
- Built an AI-based clinical summarization solution that reduced patient-record review time by 35%.
- Drove engineering process improvements, delivery visibility, quality practices, and stakeholder alignment across multiple engineering teams.

Selected Leadership & Engineering Impact: 50M+ requests/day distributed platform • 99.99% uptime • Team scaled from 5 to 10 engineers/leads • 20 hires completed through 10+ hiring drives • 3 successful promotion cases • 60% reduction in

development cycle time • 23% increase in provider adoption • 35% reduction in patient-record review time

AthenaHealth — Bengaluru, India

Lead Member Technical Staff (LMTS)

August 2018 – August 2021

- Provided technical leadership for engineering initiatives across architecture, system design, software delivery, and engineering quality.
- Served as a technical lead with partial people-management responsibilities, including mentoring and supporting engineer development.
- Led technical design and architecture initiatives for scalable enterprise software platforms.
- Partnered with engineering and product stakeholders to translate business requirements into technical solutions.
- Supported engineering delivery through design reviews, technical guidance, code reviews, and development best practices.
- Contributed to the evolution of cloud-native and distributed systems supporting enterprise healthcare platforms.

Note: This period is intentionally presented as technical leadership rather than formal Engineering Manager experience, consistent with Puneet's confirmation.

Hcentive — Noida, India

Senior Software Engineer

July 2016 – August 2018

- Provided technical leadership across enterprise healthcare and financial technology platforms.
- Designed and implemented scalable Java-based systems, APIs, microservices, and distributed applications.
- Guided engineers through technical design, development, code reviews, and engineering best practices.
- Worked with cross-functional stakeholders to translate functional and non-functional requirements into scalable technical solutions.
- Supported engineering delivery, production stability, and continuous improvement across enterprise software platforms.
- Contributed to architecture modernization and engineering process improvements.

Sapient Global Markets — Gurgaon, India

Team Lead

December 2014 – July 2016

- Led backend engineering initiatives for enterprise capital markets/BFSI technology platforms.
- Guided engineers through development, technical implementation, code quality, and delivery.
- Participated in requirements analysis, solution design, and technical execution.
- Collaborated with stakeholders to deliver enterprise software within Agile development environments.
- Mentored engineers and promoted engineering best practices.

Nagarro — Gurgaon, India

Senior Software Engineer

February 2014 – December 2014

- Designed and developed backend components using Java and Spring Boot.
- Participated in requirements gathering and translated business requirements into technical solutions.
- Developed scalable enterprise software components while maintaining code quality and maintainability.

Utiba Mobility / Amdocs — Gurgaon, India

Java Software Engineer

January 2010 – February 2014

- Developed enterprise software applications using Java and related technologies.
- Built and maintained application components supporting business-critical workflows.
- Developed automated unit tests using JUnit to improve software quality.
- Contributed to application enhancements, maintenance, and production support.

LEADERSHIP & ORGANIZATIONAL IMPACT

- **Delivery & Prioritization:** Owned end-to-end engineering delivery, resource planning, timelines, and capacity requirements while balancing product delivery, technical debt, reliability, and strategic engineering investments.
- **Stakeholder & Leadership Management:** Partnered with Product, Compliance, Engineering, and senior stakeholders to align priorities, resolve delivery dependencies, communicate risks, and secure the resources required for successful execution.
- **People Leadership:** Managed engineers through regular 1:1s, performance reviews, growth planning, mentoring, promotions, hiring, and performance management, with a strong focus on employee development and team effectiveness.
- **Engineering Transformation:** Led organizational initiatives across multiple engineering teams, driving adoption of new development practices, improving engineering productivity, and strengthening delivery predictability and quality.
- **Technical & Business Alignment:** Translated complex business and product requirements into scalable technical solutions while balancing customer outcomes, engineering quality, reliability, and delivery timelines.
- **Product & Domain Experience:** Extensive experience across Healthcare SaaS, B2B SaaS, BFSI, enterprise platforms, distributed systems, cloud infrastructure, and API-driven products, providing strong transferable experience for technology-product environments.

TECHNICAL SKILLS

Languages: Java, SQL

Backend: Java, Spring, Spring Boot, Microservices, REST APIs

Architecture: Distributed Systems, Event-Driven Architecture, System Design, Cloud Architecture, Scalable Systems

Cloud & Infrastructure: AWS, ECS, EKS, Kubernetes

Databases: MySQL, PostgreSQL, enterprise data platforms

Observability: Datadog, OpenSearch

Engineering & DevOps: CI/CD, Agile/Scrum, Release Management, Code Reviews, Engineering Metrics

Healthcare Interoperability: HL7 FHIR, SMART on FHIR, Cerner, CommonWell, CareQuality

AI & Engineering Productivity: AI-assisted development, specification-driven development, AI-based clinical summarization

Project & Collaboration: Jira, cross-functional stakeholder management, Product collaboration

EDUCATION

Bachelor's Degree — Computer Science | ICFaiTech, Dehradun | 2006 – 2010

CERTIFICATIONS

Certified ScrumMaster • AWS Solutions Architect • Certified Kubernetes Application Developer (CKAD)
